

FULLY-AUTOMATIC PREFORM KITTING PRODUCTION LINE

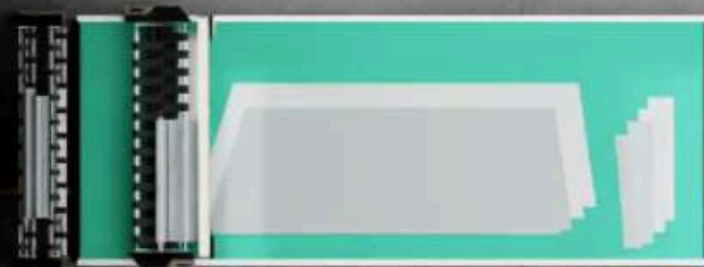

WATCH IT
WORKING

Meet our new solution for production of complete preformed kits for composite parts. From roll to full set of preform kits. Customizable sizes and types of raw material. Allows cutting angles and complex geometries. Preform stabilization using stitching between composite layers. The solution uses core technologies owned by Visdeltex.

1

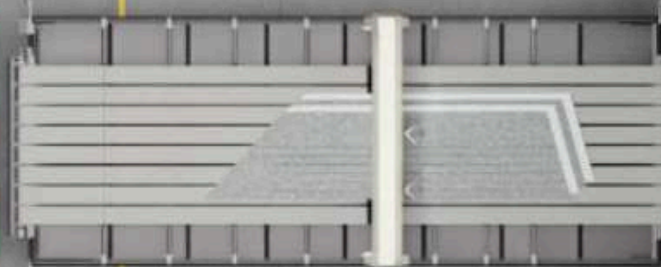

STACK BUILDER

- Automatic feed from fabric Rolls
- Offset positioning in X and Y axis
- Automatic scrap removal

2

PREFORM STABILIZATION

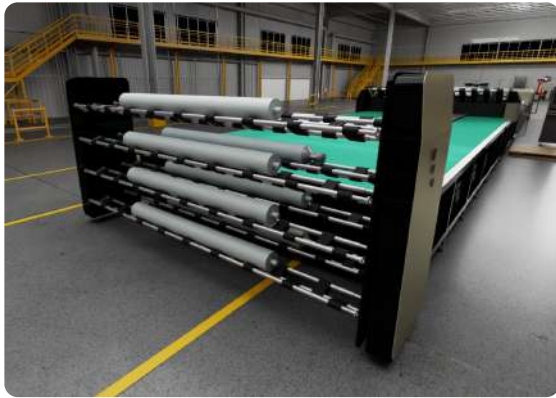

- Lockstitch technology
- Extra wide stich gap
- Stitch in X and Y axis

3

PREFORM EXTRACTION

- Extract to cart or box
- Optimized piled up

**AUTOMATIC FEED
FROM FABRIC ROLLS
(DIFFERENT MATERIALS,
DIFFERENT WIDTH)**

**OFFSET POSITIONING
IN X AND Y AXIS**

ALLOWS CUTTING ANGLES

**LOCKSTITCH TECHNOLOGY
STITCH IN X AND Y AXIS**

We bring automation into your industrial processes. We are machinery manufacturers specialized in sewing and ultrasonic technologies.
